Subject

BALTIMORE CAPITAL ADDITIONS I.A. - PURCHASE AND INSTALL
MOODY FIBER FLUFFER - \$2,100.

PLAINTIFF'S
EXHIBIT
GF-911

The attached I.A. in the amount of \$2,100. covering the cost of installing a Moody Fiber Fluffer has been submitted by Baltimore. The proposed equipment is to be installed in the Paint House to be used in the production of such items as Flash Tite and Plastic Cement.

The installation of the above subject equipment has been recommended by Mr. Kaufman of the Quality Control Department, as a means of improving the quality of the black line products by eliminating the lumps now formed in the mixing operation.

We understand that the installation of similar equipment at Joliet and Mobile has resulted in a vast improvement in their products.

We have indicated our approval of the expenditure based upon the apparent need for equipment to improve the Paint Department products, and trust you will wish to act favorably upon the request.
