SKEAN DHU HOTEL Dyce Airport, Dyce, Aberdeen
Telephone Dyce 3101 Telex "Skeedo Hotel Dyce"

Febr 23, 1976

Dear Jack,

ASB 001887

Had a good session today with Milchem
in fact it lasted all day. They have the
mud on the PPC well being drilled by the
Ocean Rover

CDD 247076

Enclosed is a copy of a letter from
Chas Perricone to Pedro Blasquez, Milchem London
which is not quite self-explanatory. It
seems that the English Health authorities are
concerned that Flosal, because of its bluish
color, may be crocidolite. An official letter
to Blasquez (with a copy to Frank Gorny - a
palish-scotsman) stating that Flosal is indeed
Chrysotile asbestos will probably be sufficient.
An explanation of the bluish color may not
be necessary but might be just as
important (Copy of letter ACP to P Blasquez, enclosed)

Went by to see Jan Slagle with IMCo
this evening - Will meet with them tomorrow.
