REF JJ - WSS BT-476 'COWLES' DISPERSIBILITY

As per the meeting of 1-10-75, we have manufactured plant sized quantities of BT-476-D:

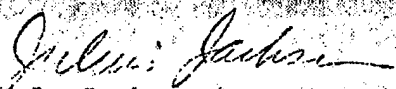

lot 55 462 - 220°F Dry

lot 55 468 - 180°F Dry

based on best presently available know how for evaluation.

Will you please evaluate these versus LGLD, BT-383-D, and any appropriate competitive flushings to determine whether or not we have any advantage to offer the trade.

We are conducting a similar study.
