

ACUTE TOXICITY TO FISH (FATHEAD MINNOW)

TEST SUBSTANCE

Identity: A mixture containing perfluorooctanesulfonate, which may also be referred to as PFOS, FC-95, or as a component of FC-3031. (1-Octanesulfonic acid) (CAS # 2795-39-3).

Remarks: The 3M production lot number was 2. The test sample is FC-3031. Current information indicates it is a mixture of 0.96% PFOS, 20% diethylene glycol butyl ether, 62.11% water, 10% ethylene glycol, 1.92% propane sultone foamer, 2.02% polyoxyethylene monooctylphenyl ether, 2.88% sodium octyl sulfate, 0.06% sodium lauryl sulfate, and 0.05% benzotriazole.

The following is an abbreviated summary of multiple fathead minnow studies on FC-3031, Lot 2. These studies apply to a mixture with incompletely characterized concentrations of impurities. Data may not accurately reflect the toxicity of the fluorochemical component of the test sample.

METHOD:

Method: Not given.

Type: Acute static

GLP: No

Year completed: 1976

Species: *Pimephales promelas*

Supplier: Not given.

Analytical monitoring: Not given.

Exposure period: 96-hours

Statistical methods: LC₅₀ values determined by graphic interpolation.

Test fish age: Juveniles

Length and weight: Average length = 48 - 50 mm
Average weight = 1.4 - 1.5 g (wet)

Loading: Not given.

Pretreatment: None.

Test conditions:

Dilution water: Aerated carbon filtered well water

Dilution water chemistry: Not given.

Lighting: Not given.

Stock and test solution preparation: Not given.

Concentrations dosing rate: Once

Stability of the test chemical solutions: Not noted.

Exposure vessels: Not given

Number of replicates: 1

Number of fish per replicate: 20 per test solution for one study. Not given for remaining studies.

Number of concentrations: five plus a blank control

Water chemistry ranges during the studies:

pH range (0-96 hours):

7.2 – 7.4 (control exposures)

Temperature range (0-96 hours):

21 - 22 °C (control exposures)

Dissolved oxygen range (0-96 hours):

5.0 – 9.2 mg/L (control exposures)

RESULTS

Nominal concentrations: Blank control, 100, 250, 500, 750, and 1000 mg/L for two studies (7/6-10/76, 7/27-31/76). Blank control, 250, 500, 750, 1000, and 1250 mg/L for one study (7/20-24/76). Blank control, 100, 180, 320, 560, and 1000 mg/L for one study (8/10-14/76).

Element values: 96-hour LC₅₀ range = 560 – 800 mg/L

Element values based on nominal concentrations

Remarks: Testing was conducted on a mixture as described in the Test Substance Remarks field. The values reported apply to that mixture and not the fluorochemical proportion alone.

CONCLUSIONS

The test sample 96-hour LC₅₀ range for fathead minnow was determined to be 560 to 800 mg/L.

Submitter: 3M Company, Environmental Laboratory, P.O. Box 33331, St. Paul, Minnesota, 55133

DATA QUALITY

Reliability: Klimisch ranking 3. Testing lacks record of methodology used. There is a lack of characterization of the test sample. Test solutions lack analytical confirmation of the amount of fluorochemical proportion in the solution.
