To: Jerry Garrett
From: Scott A. Gunderson
Subject: Asbestos Determination

Please analyze the enclosed sample to determine if it contains asbestos. The sample was taken from the ceiling of the Houston Works Engineering building. It is a sprayed-on coating over concrete approximately 1/8" thick and covers the entire ceiling. The coating is essentially intact with a few very small scrapes where something has bumped it. The building was constructed in the late 50's.

We are asking for the determination in anticipation of possible regulation which would require us to remove or encapsulate asbestos coatings in buildings occupied by people.

If you have any questions, please call me.

A handwritten signature in cursive script, reading "Scott A. Gunderson".
