Hello Eric,

I am Jeff Blackwood, Vice President of Government Relations at CropLife America, the pesticide industry trade association.

Please find attached a letter from our CEO, Alex Dunn, to Administrator Zeldin.

Thanks and do be in touch if we can ever be of assistance.

Best regards,  
-Jeff

**Jeff Blackwood**  
Vice President, Government Relations

February 18, 2025

The Honorable Lee Zeldin  
Administrator  
U.S. Environmental Protection Agency  
1200 Pennsylvania Avenue, NW  
Washington, D.C. 20004

Dear Administrator Zeldin,

On behalf of CropLife America (CLA), I would like to extend our sincere congratulations on your confirmation as Administrator of the Environmental Protection Agency (EPA). Your bipartisan Senate confirmation support reflects the confidence in your leadership and vision for protecting the environment while growing the American economy.

CLA member companies are leaders in research and development of innovative pesticides that help farmers produce more food sustainably. Every day, CLA and our member companies advocate for a strong, science- and risk-based regulatory system to help ensure public safety and confidence in pesticides and the critical role they play in protecting crops and enhancing our well-being. CLA and our members will continue working with the EPA to help provide growers with technologies to protect our food, communities, and ecosystems from the threat of pests, weeds, and diseases.

We look forward to working with you and your team to help ensure farmers maintain access to safe and effective pesticides. EPA's Office of Pesticide Programs carries out business-critical pesticide licensing activities, and we are eager to support and optimize their science- and risk-based registration procedures to help ensure timely product registrations. Additionally, we look forward to working with you on durable, science-based solutions for Endangered Species Act review of pesticide registrations that is protective of species, provides farmers with access to these essential tools, and brings legal and regulatory certainty for pesticide registrants. As the agriculture industry navigates evolving challenges and opportunities, we remain committed to working with the EPA to equip farmers with the tools they need to produce safe, abundant, and affordable food while protecting the environment and the health of our communities.

We appreciate your dedication to the environment and agriculture and stand ready to support your efforts in any way we can. Congratulations again on your confirmation, and we look forward to working together on these critical priorities.

Sincerely,

A handwritten signature in black ink, appearing to read "Alexandra Dunn".

Alexandra Dunn

Hello colleagues,

Please share this invitation with the appointees who work in agriculture at EPA. It is a WAG and there are instructions for checking with ethics on the invitation. We'd love to see some of you at this wonderful event.

Alexandra Dapolito Dunn, Esq.  
President and CEO  
CropLife America  
4201 Wilson Boulevard, Suite 700  
Arlington, VA 22203  
Phone: 202-872-3850  
Cell: 703-848-5687  
Email: [adunn@croplifeamerica.org](mailto:adunn@croplifeamerica.org)

We are excited to invite you to gather on Capitol Hill for our **Friends & Allies Reception**, presented by **CropLife America, RISE, and National Ag Day!** Please RSVP at the link below. As always this will be a great night to celebrate agriculture!

Friends and allies  
of agriculture:  
You're invited!

## A Celebration of **NATIONAL AG DAY**

March 18, 2025  
5:30–8 p.m.

Kennedy Caucus Room, SR-325  
The Russell Senate Office Building

This event is intended to be widely attended, following all House and Senate ethics rules. For Executive Branch employees, please consult your ethics counsel before attending.

 **Tuesday, March 18, 2025**

 **5:30 p.m. – 8:00 p.m.**

 **Kennedy Caucus Room, SR-325**

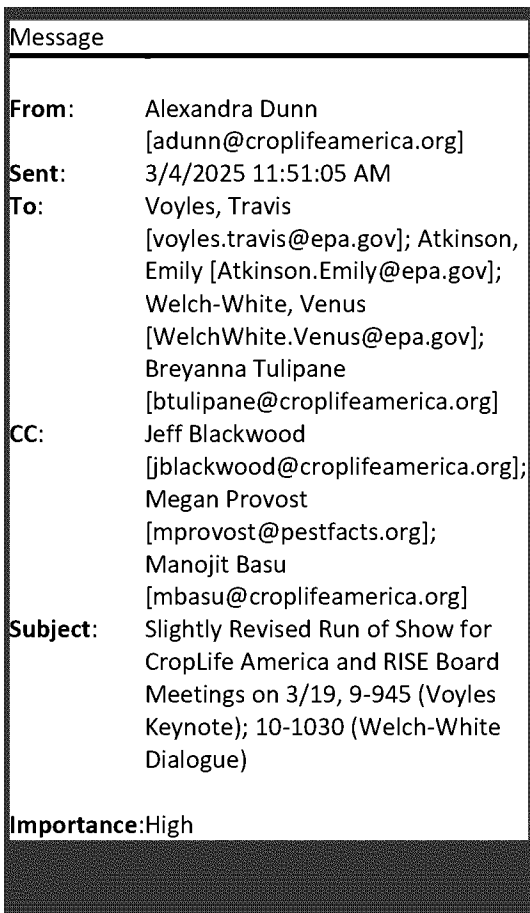

**The Russell Senate Office Building**

**2 Constitution Ave NE, Washington, DC 20002**

Join us for an evening of networking and recognition as we honor the contributions of American agriculture. Heavy hors d'oeuvres will be served.

Please RSVP [here](#).

We look forward to celebrating with you!

**Caution:** This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

Good morning colleagues,

We learned yesterday that Office of Pesticide Programs (OPP) Director Ed Messina and his two office directors who we invited to a one hour "listening session" with the CLA/RISE Boards on 3/19 from 1045 to 1145 am are not attending. Dr. Beck assessed that since Deputy Assistant Administrator (DAA) Voyles is confirmed, with that Ed, Dr. Welch-White, and the CLA & RISE officials (myself and Megan Provost) pre-briefing DAA Voyles, it is unhelpful for career leaders to attend in *listening only* mode.

We adjusted the run of show below. Dr. Welch-White, please note **Jeff Blackwood** now will moderate the conversation to which we have invited you as I now will moderate the session replacing the OPP listening session, which will be on MAHA.

See the revised run of show, and DAA Voyles, we look forward to our prep call on 3/7 at 1130 am. @Breyanna Tulipane please update the online agenda!

### **CLA/RISE Joint Boards Meeting: Wednesday, March 19, 2025**

**7:30 AM – 9:00 AM**

**Location:** Westin Arlington, F. Scott Fitzgerald Ballroom A/B  
Breakfast Available

**8:00 AM – 8:30 AM**

**Location:** Westin Arlington, F. Scott Fitzgerald Ballroom A/B  
Overview and context for the morning agenda's structure.

**9:00 AM – 9:45 AM**

**Location:** Westin Arlington, F. Scott Fitzgerald Ballroom C/D/E

## **Keynote Address**

*Travis Voyles*, Deputy Assistant Administrator, EPA (*confirmed*)

Introduction and Q&A moderation by *Darren Dillenbeck*, CropLife America Chairman and Vice President and President of FMC North America

## **BREAK**

**10:00 AM – 10:30 AM**

**Location:** Westin Arlington, F. Scott Fitzgerald Ballroom C/D/E

## **Dialogue with EPA Acting Agricultural Office Director**

*Dr. Venus Welch-White* (*invited*)

Introduction and Q&A moderation by Jeff Blackwood, CropLife America Vice President of Government Relations

## **BREAK**

**10:45 AM – 11:45 AM**

**Location:** Westin Arlington, F. Scott Fitzgerald Ballroom C/D/E

## **Making America Healthy Again: Engaging with the Movement**

*Charlie Arnot*, Chief Executive Officers, Center for Food Integrity (*invited*)

*Terri Moore*, Vice President of Communications, American Farm Bureau Federation (*invited*)

Moderated by *Alexandra Dunn*, President and CEO, CropLife America

## **BREAK**

**12:00 PM – 1:15 PM**

**Location:** Westin Arlington, F. Scott Fitzgerald Ballroom C/D/E

## **Joint CLA Board of Directors and RISE Governing Board Luncheon & Presentation**

### ***Election Implications and Congressional Outlook***

Nathan Gonzales, Editor & Publisher, Inside Elections LLC

Introduction and Q&A Moderation by *Neil Cleveland*, RISE Governing Board Chair and Senior Vice President and General Manger, PBI Gordon Corporation

## **BREAK**

Hi Lynn and Derrick,

Heads up on this Congressional letter that's circulating this week and should be delivered later this week to Administrator Zeldin, as well as Secretaries Kennedy and Rollins.

Also, as background, please see the attached letter of March 7 from a broad industry coalition raising related concerns.

Please be in touch if we can be of any assistance.

Thanks and best,  
-Jeff

**Jeff Blackwood**  
Vice President, Government Relations  
202-604-3771

April XX, 2025

The Honorable Robert F. Kennedy, Jr.  
Secretary  
U.S. Department of Health and Human Services  
200 Independence Ave SW  
Washington D.C., 20201

The Honorable Brooke Rollins  
Secretary  
U.S. Department of Agriculture  
1400 Independence Ave SW  
Washington D.C., 20250

The Honorable Lee Zeldin  
Administrator  
U.S. Environmental Protection Agency  
1200 Pennsylvania Ave NW  
Washington D.C., 20004

Dear Secretary Kennedy, Secretary Rollins, and Administrator Zeldin:

We write to express our strong appreciation for your leadership and interest in working with each of you to ensure America has the healthiest people in the world. In recent decades, chronic illness rates have risen. This warrants our careful scrutiny and to support better health outcomes. It is essential that policies supported by sound science and risk-based analyses are used to accomplish this goal.

We also urge you to safeguard the work of the Make America Healthy Again Commission (Commission) from activist groups promoting misguided and sometimes even malicious policies masquerading as health solutions. The influence of these groups in the Commission would result in shoddy science; a less abundant, less affordable food supply; greater reliance on foreign adversaries for our food; diminished U.S. agricultural production and manufacturing; and, ultimately, poorer health outcomes.

President Trump recently stated environmental activists were holding the economic prosperity of our country hostage. We now have concerns that they are seeking to influence the work of the Commission to advance their agenda.<sup>1</sup> For decades activist groups have tried to ban safe, well-regulated agricultural inputs by any means necessary. Without these products, yields and quality are negatively impacted by otherwise avoidable insects, fungus, weeds, and other pest pressures. This drives up food prices for American consumers and forces reliance of food imports.

The same groups have seized upon the Commission's work as an opportunity to misrepresent the science on common food and feed categories or ingredients, such as plant-based oils. These inputs are subject to a robust, risk-based regulatory system which focuses on protecting human health. Unfounded accusations harm the U.S. farmers who grow our food, upend food and feed supply chains, and significantly increase grocery food prices – all without public health benefit.

---

<sup>1</sup> Center for Biological Diversity. February 18, 2025. *A Petition to Make America Healthy Again*.  
[https://biologicaldiversity.org/programs/environmental\\_health/pdfs/FINAL-MAHA-Petition-2.18.25.pdf](https://biologicaldiversity.org/programs/environmental_health/pdfs/FINAL-MAHA-Petition-2.18.25.pdf)

We have concerns that environmentalists are advancing harmful health, economic, or food security policies under the guise of human health. Despite insinuations to the contrary, regular testing by FDA and USDA finds that more than 99% of all pesticide residues meet extremely conservative limits established by EPA according to the best available science.

We applaud the Commission's desire to improve the health and well-being of Americans. We implore you to ensure policy decisions are grounded in sound science and risk-based analyses. With unity, we can protect American agricultural producers from environmental activists' attacks on proven-safe inputs critical to their profitability and long-term viability while promoting positive health outcomes.

Sincerely,

[signature]

[name]

U.S. Senator

March 7, 2025

The Honorable Robert F. Kennedy  
Secretary  
U.S. Department of Health and Human Services  
200 Independence Avenue, S.W.  
Washington, D.C. 20201

The Honorable Brooke Rollins  
Secretary  
U.S. Department of Agriculture  
1400 Independence Avenue, S.W.  
Washington, D.C. 20250

The Honorable Lee Zeldin  
Administrator  
U.S. Environmental Protection Agency  
1200 Pennsylvania Avenue, N.W.  
Washington, D.C. 20004

Dear Secretary Kennedy, Secretary Rollins, and Administrator Zeldin,

As organizations representing the food and agriculture community, we write to express our interest in working with you and the Make America Healthy Again Commission in advancing our shared goals of improving health outcomes for Americans while protecting our most vulnerable populations. At the same time, we are eager to share with the Commission our significant concerns regarding unfounded criticisms levied against the safety of the food and agricultural value chain. It is essential that as these topics are reviewed, the Commission respects and reinforces the robust science- and risk-based regulatory systems to which products are already subject and the abundance of fit-for-purpose scientific literature on these matters. We urge the Commission to draw conclusions from the significant body of sound, quality science and data while resisting policy changes based on misleading or outlier studies.

The February 13, 2025, executive order, *Establishing the President's Make America Healthy Again Commission*, referenced several items important to our organizations. Modern agricultural tools like pesticides and biotechnology are critical components of a healthy and dynamic food system and farm economy. U.S. produced food and feed ingredients are the foundation of a safe and affordable food supply for all Americans.

Pesticides are used in all types of agricultural production, from conventional to organic. These products are critical for ensuring a safe, abundant, and affordable supply of food, feed, fuel, and fiber. Without access to safe, well-regulated pesticidal tools, our nation's growers and agricultural producers would be vulnerable to devastating insects, fungal diseases, and weed pests that can completely destroy a crop. Economy-wide, this would impact the cost and availability of food for American consumers. Further, pesticides are vital for protecting public health from diseases carried by animal pests like bed bugs, rodents, and mosquitoes, which can carry diseases like West Nile virus or Dengue Fever. Leveraging the safe use of pesticides is also critical to supporting soil health conservation practices such as no-till; controlling weeds that could damage critical infrastructure; and controlling vegetation that contributes to wildfire fuel loads. Without risk-based scientific regulatory processes providing for access to and safe use of pesticides, U.S. growers and producers will become less competitive in the marketplace. Less U.S. production means Americans will increasingly rely on other countries for our food, leading to higher prices, reduced food security and compromised national security. A nation that chooses not to feed itself is not secure.

Importantly, in 1996 Congress enacted the *Food Quality Protection Act (FQPA)*, which directs that there must be "reasonable certainty" no harm will result from pesticide residue exposures, with explicit emphasis placed on protecting infants and children. In implementing FQPA—which EPA completed in

2006 and periodically reviews—the agency regularly uses one or more safety factors, including a default “10x factor.” This means residue limits are very low risk and consistently set 10 or even 100 times more conservative than is already found to be safe. These limits are established using a variety of literature sources that EPA’s scientists independently determine are fit for regulatory purposes. In testing for residues, USDA and FDA annually find that more than 99% of food and feed products comply with these exceptionally conservative standards. As a result, the U.S. regulatory process is the global gold standard for ensuring the public is protected from pesticide residues.

Similarly, the U.S. has in place appropriate, science-based processes for regulating products of biotechnology and genetic improvement technologies. In recent decades, these innovations have helped farmers reduce crop input use; mitigate pest pressures; enable soil health practices, such as no-till; and enhance the nutritional profile of foods to improve health outcomes for consumers. Biotechnology has also been crucial in allowing farmers around the world to increase yields on existing farmlands to feed a growing global population, reducing the need to convert environmentally-sensitive lands (e.g., forests) into cropland for food production. Additional research is underway exploring ways to use genetic innovations to reduce food spoilage and waste, improve drought tolerance, among many other important developments.

USDA regulates biotechnology innovations to ensure they are safe for environmental release and do not pose a plant pest risk, while FDA evaluates new plant varieties produced using biotechnology to ensure they do not pose a food or feed safety risk. EPA also reviews biotechnology varieties intended to protect crops from pests to ensure they are safe for human health and the environment. Both long-term and short-term risks are evaluated in these assessments. Further, many of our trade partners evaluate biotechnology products to ensure compliance with safety standards around the world. In the more than 30 years since their initial agricultural uses, products of biotechnology are now safely grown globally on nearly 500 million acres each year to help meet food, feed, fuel, and fiber needs.

It is also essential to note that the U.S. has in place a robust regulatory process for ensuring the safety of food and animal feed ingredients. The *Federal Food, Drug, and Cosmetic Act (FD&C Act)* gave FDA the authority to oversee food safety and approve ingredients and additives for human and animal consumption. The FD&C Act has been updated by Congress numerous times, most recently in 2024. Through the authority granted by this legislation, FDA establishes regulations for food and animal feed labels, ingredients, and additives that are generally recognized as safe (GRAS) or approved additives. Importantly, FDA requires that the safety of GRAS ingredients and food and animal feed additives must be science-based and meet FDA safety standards. Much like the oversight of agricultural tools, there must be a “reasonable certainty” that these food and animal feed additives and ingredients do not harm consumers.

A domestic value chain for U.S. food products is the most efficient way to ensure continued access to safe, affordable food products. Limiting GRAS ingredients and additives due to dubious studies that do not meet appropriate data quality standards could lead to food shortages, limited options for consumers with dietary or religious food restrictions, intensified food waste, and increased imported food ingredients that would both spike costs and decrease food safety certainty.

While we welcome the administration’s focus on improving human health and the rigor of our regulatory systems, any reviews of these processes, or the products they regulate, must carefully consider the breadth and quality of scientific literature available on these topics. Reviews must also ensure necessary safeguards to protect scientific integrity. Too often, critics of modern agricultural production have singled out and relied on outlier studies that support their policy agendas, ignoring the strong consensus of available scientific evidence. They also have contorted screening level studies, such as those that feed

test animals hundreds or thousands of times above the acceptable daily intake limits for humans, as a justification to ban substances. Sometimes they have gone as far as to design their own studies to obtain a predetermined outcome, such as selecting test animals genetically predisposed for health ailments. Regulatory agencies have data quality standards and protocols in place to screen out poor studies and ensure others are used appropriately. It is essential that agency scientists and experts retain the autonomy needed to determine the appropriateness of data considered in science- and risk-based regulatory systems.

Our organizations support and share in the goal of improving health outcomes for Americans, but it is vital that any review efforts of the Commission or individual participant agencies are based on quality data and accept the strong scientific consensus on these topics. Further, any assessments must acknowledge the robust science- and risk-based processes our regulatory agencies already have in place and the extensive history of safe use that has resulted therefrom. Failing to maintain these indispensable standards is regrettably likely to result in Americans becoming less healthy. It risks not only harming our nation's growers, producers, and food processors, but also the consumers we proudly serve.

We look forward to future dialogues with the Commission as we collectively seek to improve health outcomes in the U.S. and thank you for your attention to this important matter.

April 7, 2025

Mr. Travis Voyles  
Assistant Deputy Administrator  
U.S. Environmental Protection Agency  
1200 Pennsylvania Avenue, NW Washington, DC 20004

Via e-mail to [voyles.travis@epa.gov](mailto:voyles.travis@epa.gov)

Dear Assistant Deputy Administrator Voyles,

On behalf of CropLife America (CLA) and RISE (Responsible Industry for a Sound Environment), we express our thanks to you for Keynoting our joint *Winter Boards Meeting* on March 19, 2025, at the Westin Arlington. Your remarks were detailed, thoughtful, and impactful. Our members appreciated the time you took to answer questions from the podium, and that you remained on site to talk with individuals one-on-one.

You have many responsibilities at the U.S. Environmental Protection Agency, and it made a real difference to both CLA and RISE that you took time from your schedule to speak to issues critical to our industry sector. These included timely pesticide registrations, modernizing the functionality of the Office of Pesticide Programs (OPP), registrant contributions to pesticide submissions, and the importance of strong resources and workforce within OPP to reduce the pesticide registration backlog.

We look forward to a continuing dialogue with you. We are always available to answer any questions or to serve as a resource to you and your colleagues at the Agency on these key issues.

With our best regards,

A handwritten signature in cursive script, appearing to read "Alexandra Dapolito Dunn".

Alexandra Dapolito Dunn  
President and CEO, CropLife America

Dear Assistant Deputy Administrator Voyles,

First, thank you for speaking to CropLife and RISE in mid-March! You were spectacular and we will be sending a formal thanks your way any day.

In my non-CropLife capacity I am inviting you on behalf of the American College of Environmental Lawyers to Keynote the College's Mid-Year Meeting on May 22 here in Washington, DC. We are hoping you could provide luncheon remarks, as outlined in the attached letter, on the Administrator's five pillars, state roles, and other developments.

We would be grateful to have you and are here to answer any questions! We are beginning to promote the meeting this week, and ask that if possible, we list you as "invited" if you are amenable to that, while you consider the invitation.

Kindly let us know, and thank you for accepting my repeated invitations,

Regards,

Alex

Many thanks Ashley and hello Principal Deputy Administrator Beck! I didn't think it would be long before we'd connect again, and we are so very happy to see you in your role.

Jeff will follow up with you Dr. Beck to let you know what we are hoping to accomplish – our Board Members would very much like to meet with you Dr. Beck, but they do want to meet with Administrator Zeldin, so I hope the two meetings are not mutually exclusive Ashley.

All the best, Alex

Dear Mr. Amidon and Mr. Carpenter,

On behalf of CropLife America, the nation's association for agricultural pesticide companies, we respectfully request a meeting with Administrator Zeldin to discuss two key issues of top importance to our industry. First, the Administrator's leadership role on the Make America Healthy Again (MAHA) Commission and second our suggestions for modernizing changes in the Agency's Office of Pesticide Programs within the Office of Chemical Safety and Pollution Prevention (OCSPP).

It would be our intent to have two or three members of our Board of Directors attend this meeting with me. A half hour of the Administrator's time would be appropriate. We would accept any time that the Administrator has available between now and April 29.

By way of introduction to me, I served in Trump 45 as the Region 1 Administrator from 2018-2019 and as the Senate confirmed Assistant Administrator for OCSPP from 2019-2021. I know Mr. Carpenter from that time, and Mr. Amidon, I look forward to meeting you.

Regards,
