Ryan,

Thanks for your outreach. It has definitely been good to begin to get to know Senator Inhofe, and I admire his leadership on the Lautenberg Chemical Safety Bill, and appreciate your constructive role on that as well.

I would suggest that you and Elizabeth, copied above, discuss next steps re your invitation.

All best,

Fred

All, Administrator Pruitt asked me to reach out to you to check on your availability to meet for coffee to establish a relationship between EDF and him.

He appreciated me recounting the story of when I was working for Senator Inhofe, how Senator Inhofe called Fred unexpectedly prior to an EDF board meeting simply to report on the status of negotiations at the time of the TSCA update. It's a much broader environment here now than negotiating the Lautenberg Act, but the Administrator was interested in meeting to try to build a relationship and identify common ground and items on which we can work together.

I appreciate your consideration. I can also be reached at Ex. 6 - Personal Privacy anytime.

Ryan.

> The Tribal FIP is a national two-part registration process for new and minor modifications of true minor oil and gas production and processing facilities. The Tribal FIP's registration process presents a streamlined permitting mechanism that stands in place of the requirement to obtain source-specific New Source Review (NSR) permits. The Tribal FIP requires registered facilities to comply with eight (8) existing federal air quality standards, including the New Source Performance Standard (NSPS) OOOOa for oil and gas, and address threatened and endangered species and historic properties.
>
> As it stands, the Tribal FIP does not apply in nonattainment areas. EPA should revise the Tribal FIP to allow application of this streamlined registration process in nonattainment areas until a local or reservation-specific permitting program (FIP/TIP) is finalized.
