May 23, 1983

Mr. Gene Szetela
American Cleaning Equipment Corp.
15123 W. Warren
Dearborn, MI 48126

Dear Gene,

We have completed our review of the asbestos dust vacuum cleaner materials which you submitted.

Our Industrial Hygiene activity has indicated that the 1976 Clayton Environmental test report adequately reflects compliance with OSHA requirements. They would, however, appreciate copies of government specifications Mil-F-51079A; Mil-F51068D and A.E.C.-Regulatory Guide #1.51. In addition, we suggest that the vacuum be periodically tested to ensure conformance to any changes in the current regulations or government specifications.

The "caution decal" has been reviewed and is acceptable. It must be affixed to all Rotunda units. We also suggest that you incorporate the Rotunda part number 91-0002 for the replacement filter kit. The operating instructions should be Rotundaized and we suggest you reorganize the information on Page 2. Specifically, just above the paragraph that begins "Whenever you are using this vacuum cleaner ...", insert a title that states: "Warning" and then a sub-title "Protect your health and safety." In addition, Item 4 on the same page should be moved up to be Item No. 1.

To complete this project, copies of your certificates of insurance and the "vendor broad form endorsement" identifying Ford Motor Company as an additional insured party should be forwarded to Mr. J. S. Benson of this activity. If you have any questions, please do not hesitate to call.

Thank you for your usual fine cooperation.

Sincerely,

S. F. Svoboda
