Mr. Robert W. Modrell
B. F. GOODRICH COMPANY
Department 0020 - Building 5-H
500 South Main Street
Akron, Ohio

Dear Mr. Modrell:

Thank you for your phone call May 13 requesting details on F. & D.A. approval of Ferro 760-X. I am enclosing a copy of the letter we received from U.S.F. & D.A. giving us clearance on this product so that you can see for yourself the range of approval they have given this product.

I understand you already have sufficient information along these lines on Ferro 765-A, B, and C and in general we believe the clearance for Ferro 760-X follows the same lines. *

Thank you for your interest and this opportunity to cooperate with you.

Faithfully yours

FERRO CHEMICAL

Ferro Chemical Corporation
Attention of Mr. F. R. Hansen
Bedford, Ohio

Dear Mr. Hansen:

This is in reply to your letter of June 20 outlining a program to determine the leachability of ~~xxx~~ in your stabilizer formulas for stabilizing polyvinyl films.

The additional information supplied in this letter and reviewed in light of the information in your letter of May 31, leads us to the conclusion that your stabilizers as they will be used in the manufacture of the polyvinyl film will not contribute ~~xxx~~ to foods that may be wrapped in the finished film. Leaching studies will not be necessary. The two stabilizers 760X and 707X are acceptable for the proposed uses.

Sincerely yours,

A. J. Lehman
