DUTCH BOY WHITE-LEAD

MORE painters every day realize how great a help pure white-lead, such as Dutch Boy, is to them. Have you ever stopped to consider the many ways in which it serves?

On interior work, pure white-lead is used for flat or eggshell gloss finishes . . . grounds for

Tiffany blends . . . under-coatings for enamel . . . various mottled and figured effects . . . plastic paint that gives the popular low-relief tex-

tures. And it is used in painting every type of interior surface—wood, plaster, wall board, fabric, metal.

For outside work, pure white-lead has long been the standard protective and decorative coating—the skilled painter's paint.

Dutch Boy white-lead, obtainable both in heavy paste and soft paste form, is pure white-lead. 100 pound steel kegs, 50, 25, 12½ pound steel pails. As a guarantee of purity, the Dutch Boy trademark is on every keg.
