De Laval multi-stage turbine generators are at work in industrial, central station and municipal power plants throughout the country. In fact, we have more than a half century of experience in the design and construction of turbine generators for high pressure, high temperature operation. These units are available from 25 to 11,500 kw for straight condensing, low pressure, mixed pressure, extraction and combined mixed pressure and extraction applications. Send for Bulletin 4200 giving complete data.
