Dear [REDACTED]

At the mega-webex on Monday you mentioned that you have a consultant who looks into epidemiological studies for the FFF-restriction. I was wondering if you have any further information to share on this at the moment. As a part of the PFAS restriction work we are assisted by colleagues from the Norwegian Institute of Public Health who will look at epidemiological studies from the general PFAS perspective, and maybe we could take advantage of the common interests in this field. My colleague [REDACTED] is coordinating the work with the institute.

Best regards,

[REDACTED]
