

1 in Canada."

2 I will move these and other documents into
3 evidence at a later date.

4 Just a couple of more discovery responses
5 here. Thank you for bearing with me.

6 In response to our admission request number
7 16, OCF has stated, it admits that it knew its Kaylo
8 asbestos-containing pipe and block insulation would be
9 handled, moved, removed from its container, cut,
10 sawed, installed, and moved.

11 In its supplemental response to admission
12 request number 23, OCF admits that its asbestos-
13 containing insulation products may have emitted some
14 dust, a small percentage of which contained asbestos
15 when the product was cut or sawed during application.

16 OCF also admits that asbestos-containing
17 cements previously manufactured and/or sold by OCF may
18 have emitted some dust, a small percentage of which
19 was asbestos when the product was mixed during
20 application.
