

June 26, 1946

Dr. McKeen Cattell,  
Department of Pharmacology,  
Cornell University Medical College,  
1300 York Avenue,  
New York City 21.

Dear Dr. Cattell:

I have just noted in a letter from Dr. Haag, Secretary of the American Society of Pharmacology and Experimental Therapeutics, that you have succeeded Dr. Wallace as editor-in-chief of the Journal.

It so happens that Dr. Deichmann of this Laboratory has had an exchange of correspondence with Dr. Wallace, with reference to a paper on DDT. I also wrote Dr. Wallace recently on the matter, and I have no doubt that my letter is available in the files. I have no wish to revive the matter, since actually my letter did not require any reply from Dr. Wallace unless he wished to do so. On the other hand, it has occurred to me by reason of your direct association with this problem, you might wish to reconsider the publication of his paper. If that should be the case, we should be glad to forward it to you. On the other hand, if you are satisfied to let the matter rest as it now is, I shall be quite content.

In any case, I wish to express my good wishes to you in this new responsibility. I trust it will not be too much of a burden to you, and that there will be an occasional pleasure and satisfaction to repay you in some measure for the drudgery which an editor has to go through with.

Cordially yours,

---

Robert A. Kehoe, M. D.
