Dr. Irving J. Selikoff, M.D.
Environmental Sciences Laboratory
Mount Sinai School of Medicine
Fifth Avenue & 100th Street
New York, New York 10029

Dear Dr. Selikoff:

I was very disappointed to learn of your decision to terminate, at least for now, the investigation of our cementitious sprayed fireproofing.

We also were provoked at the delays in determining the proper plenum system for monitoring the air flow but had been misled on several, denied on some and finally pinned down definite plenum systems.

However, we acknowledge your position, but hope that you will allow yourself the objective analysis of cementitious materials along with the fiber installations which are so predominant in the New York area.

As discussed with Mr. Nicholson, I will forward a representative list of major projects west of New York that you might consider monitoring for a comprehensive cementitious study.

Please contact me at any time on this matter, since we represent the major cementitious interest in sprayed fireproofing in the United States and Canada. I look forward to further contact on general and specific matters relative to this matter.

Thanks for your patience and consideration of our request. We wish you continued success and are most grateful for the excellent work to date in alerting us to the dangers of the present product and working conditions.

Yours truly,
