Categories: #DONE

Dear colleagues, if time, it might be good to place a footnote to table 11 just mentioned here below, to explain the differences between soil limit and target values (the meaning is dependent on regional regulations and so we cannot compare directly by looking at the table without more information)

Subject: [■■■■■] RE: GDPC 04:10 meeting - AP 7.1. - CCIEP PFAS report approval by 07/10 COB

Dear colleagues,

As discussed during the GDPC meeting of this week it was still possible to provide feedback on the current version of the report until the end of this week.

Unfortunately we had missed an inclusion suggestion by our WL colleagues in Table 11 of the report. In the annex you can find the updated report with the included input from the WL colleagues in table 11.

My sincere apologies to the WL colleagues for not including this in the previous version, please let me know if any other feedback might be missing. Additions and feedback are still possible by the end of this week, after which the report will be sent to the JICEH for info.

Many thanks for all this work!

Kind regards,

■■■■■

Onderwerp: GDPC 04:10 meeting - AP 7.1. - CCIEP PFAS report approval

Dear colleagues,

In the annex you can find the 2022 version of the CCIEP PFAS working group report on PFAS in Belgium and its corresponding non-confidential Annex. During the GDPC meeting next week we would like to discuss this report for approval by the GDPC (AP 7.1).

We would like to invite the members to especially have a look at the Summary and the Discussions & Perspectives sections of this report.

I would like to thank all the members of the CCIEP PFAS working group for contributing to this new version of the report!

Kind regards,

■■■■■ ■■■■■
