

N 27624

analgesics, ARTHROPAN Liquid provides the *anti-inflammatory*, as well as the *analgesic* and *anti-pyretic* properties of aspirin. One teaspoonful of ARTHROPAN Liquid is equivalent in salicylate content to 10 gr. of aspirin.

Pleasant mint-flavored liquid excellent for long-term therapy

Pleasantly mint-flavored and easy to take, ARTHROPAN Liquid eliminates the need to swallow many tablets day after day. It also avoids taste fatigue, since its flavor can be varied by adding water, carbonated beverages or fruit juices. It provides unsurpassed dosage flexibility and may be used by patients who should avoid sodium.

ARTHROPAN Liquid is not a combination of several drugs. It contains a single active ingredient—choline salicylate—and is free of phenacetin and caffeine.

Indications

ARTHROPAN Liquid is indicated as an analgesic for the temporary relief of pain of rheumatoid arthritis, rheumatic fever, osteoarthritis and other conditions for which oral salicylates are usually recommended.

Dosage and Administration

Recommended dosage for adults and children over 12 years is one (1) teaspoonful (5 ml.) providing 870 mg. choline salicylate; may be mixed with fruit juices, carbonated beverages or water. Dosage may be repeated every 3 to 4 hours, as necessary, but not more than 6 times in one day.

Supplied

Bottles of 8 and 16 fl. oz. (1 pt.).
