Stokers		inside air	4, 5
self feeding devices	181	inside for summer	4, 5, 6
types of mechanical	181	inside for winter	4, 5, 6
Strainers		measuring of duct	362
oil	231	measuring of room	362
Styles of roof ventilators	477	outside air	6, 7, 8, 9
Supply		outside in summer	7
control of steam	203	outside in winter	6
Surface		performance data of regulators	275, 276
determination of net outside wall	46	wet bulb	370, 371
heat insulation for pipes and	247	Temperature and humidity control	434
switch	204	Theatres	
Synthetic air chart		quantities of air for ventilation	358
data sheet for	487	Thermometers	
description of	484	recording	362
making the test	485	Thermostats	
plotting the test data for	488	classes of	260
recommended percentages based on	388	electric	272
stations for making test	486	pilot type	261
Systems		unit type	270
air sealed or closed hot water	129	Transmission	
air valves for one-pipe gravity steam	81	effect of humidity on heat	75
application of fan furnace, to standard duct		heat coefficients	9, 10, 13, 21, 47
systems	190	heat, data	13
application of warm air heating	167	Traps	
boiler protection in vapor	85	air	309
capacities of risers for one-pipe low pressure	94	alternating receiver type	309
steam		arrangement of alternating receiver	309, 310
capacities of risers for two-pipe low pressure	94	arrangement of lifting trap	302, 308
steam		arrangement of return trap and receiver	307, 309
central heating	203	by-passes	306
connections for one-pipe gravity steam	81	capacity of	306
description of piping for steam heating	80	design of tilting	308
design of gravity circulating warm-air		high-pressure	306, 307
heating systems	167	lifting	308
design problems of steam heating	79, 97	low-pressure	308
designing a furnace heating	169	oil	309
determining size of pipe in vacuum pump	106	principle of operation	306
down-feed of piping	80	types of	306
downward, of ventilation	361	uses of	306
exhaust	431	Tumbler dryers	451
gravity for hot water supply	342	Typical installations of fan system	380
gravity, of piping	80	U	
one-pipe gravity steam	80, 81	Unit control	
pipe sizes for hot water	341	industrial applications of	273
piping and connections for two-pipe gravity	336	Unit heaters	
pressure drop in water	83	air vent in industrial	200
return systems for two-pipe gravity	116	B.t.u. capacity of industrial	198
rule for design of pipe	199	control of room temperatures in industrial	200
specifications for heating	82	discharge outlets	199
two-pipe gravity	80	double automatic temperature control	272
up-feed of piping	361	for industrial service	391
upward, of ventilation	80	industrial	197
vacuum, of piping	85	of industrial	198
vacuum pump	83, 84	pneumatic control of	272
vapor	80	present day tendency of industrial	199
vapor, of piping	81	propeller fan type heaters	199
vapor vacuum type	379	recirculating industrial heaters	198, 199
ventilation	85	suspended industrial heaters	199
venting valves, vapor	167	types of industrial	197, 199
warm air heating		use of industrial	197
		Unit systems	389
		application of automatic control	263
		fan radiator units	263
