Mr. Joseph R. Darby
Research Section Manager
Monsanto Company
1700 South 2nd Street
St. Louis, Missouri 63177

Dear Mr. Darby:

In accordance with our recent telephone conversation, Bob Braddicks and I plan to spend Tuesday, June 22 with you at your laboratory in St. Louis. We will plan to arrive Monday evening, June 21, at 5:24 P.M. on TWA Flight 147 and return to New York Tuesday evening at 4:50 P.M. Please make arrangements for our lodging at a convenient location and advise us concerning where we will be staying. Unfortunately, Bill Bauer will not be able to accompany us on this trip.

711: We would like to review the following subjects concerning "Santicizer"

1. Weathering and oven aging resistance of poly(vinyl chloride) containing this plasticizer.
2. The statistical study of low temperature properties of poly(vinyl chloride) comparing "Santicizer" 711-G and 711-M, which you had briefly commented on at our meeting of May 5.
3. The product specifications and test methods for determining the properties defined in the specifications.
4. Typical shipping data for "Santicizer" 711.
5. Toxicological properties of "Santicizer" 711. NWT

Bob and I are looking forward to seeing you on June 22.

Very truly yours,

L. G. Krauskopf
Group Leader
Vinyl Resins and Plasticizers
