PLASTICIZER RESEARCH REPORTS

YOUR MEMOS: 11/13/64 AND 12/15/64

Dominic Danna, DDANN

In discussions with Dr. Farrar and John Keleti, we have decided to send MOCAN the Progress Reports concerned with the job numbers attached. This list includes roughly 80% of those reports requested by Keleti. In discussions with him, Keleti agreed that he had no requirement for the remaining 20%.

Therefore, Mrs. Samuels will set up our Progress Report distribution such that you will routinely receive these reports for transfer to MOCAN and also reports on continuing programs when new job numbers replace an old one.

Probably it would be advisable to review our report distribution practice annually to assure that changes here and at MOCAN do not obsolete the basis on which this decision was made. Mr. Keleti now has "a need to know" information contained in the approved reports, since he is actively in Plasticizer Technical Service Work, operating from MOCAN'S Research Department.

Concerning already issued Progress Reports, since the library does not retain spare copies, we will photocopy all reports issued on the attached list during 1964 and send them to you within two weeks.

By way of review you will receive:

1. Copies of all pertinent Progress Reports thus far issued in 1964, within two weeks, for transfer to MOCAN.
2. You will receive a copy of any pertinent Progress Reports issued in December 1964, when distributed (about 1/15/65).
3. During 1965, you will routinely receive copies of pertinent Progress Reports for transfer to MOCAN. Some of the job numbers will be changed for 1965 but the programs will be covered to the same extent as 1964.

Joseph R. Darby
