S-RV6

THE ASBESTO-BAG

FEATURING:

- VELCRO CLOSURE
- UNIQUE TIE-OFFS
- TOOL POUCH
- DISPOSABLE WASTE BAG
- REUSABLE UPPER GLOVE BAG
- HEAVY 12 MIL. PVC MATERIAL

Asbestos removal made simple, quick and cost effective using the new Asbesto-Bag. No zippers or zip locks to fight when installing bag to pipe. Simply press velcro together for quick attachment. If necessary use elastic cord, rope or twine, attached to the tie-offs, to suspend Asbesto-Bag up and off the pipe, ie: hot pipe, valves, etc.

After the disposable bag is full, seal the bottom velcro strip, remove and seal lower disposable bag. Attach new disposable bag, open bag and continue working. Do not throw away the upper glove bag.

Asbesto-Bag Part #RV6 fits pipe sizes 1" - 6" covered pipe. Attach by taping, or with part #QR-50 reusable optional tie-down strap.

When you have a larger than 6" diameter pipe, use the XT — a series of extensions. As an example: The XT-18 converts the RV6 bag to fit a 12" diameter pipe.

Upper glove bag is made of heavy duty 12 mil. PVC clear material for optimum visibility that resists tearing and has high tensile strength.

OR build your own glove bag — call us for your special needs. We have been making glove bags and contaminants for the nuclear industry for many years.

Let's work together for a better bag.

ORDERING INFORMATION:

P/N

RV6	Asbesto-Bag with velcro closures, disposable bag 36", tie-offs as shown above.
RVN6	Asbesto-Bag with velcro closure, NO TIE-OFFS , disposable bag.
V6	Asbesto-Bag with velcro closure, tie-offs.
VN6	Asbesto-Bag with velcro closure. NO TIE-OFFS .
T-RV6	Asbesto "T" Bag with velcro closures, disposable bag 36", tie-offs as shown above.
