Subject: Safety Committee Minutes

Interoffice
Communication

VISTA

Injury and Exposure Trends

- No discussions on injuries.
- A total of 19 sample results are questionable due to chromatograph problems. These samples are not being counted in plant statistics. Dave Cox is writing a letter to explain why the results are questionable.
- David Hollis questioned several additional samples.

Sub-Committee Progress

Interlock and Alarm Setpoint - Incinerators, boilers and AMS Kill pots complete, Initiator freezers temperature alarms added to this list. Reactor instrumentation and dryers yet to do.

Blinding - Progress noted on agenda. Make up and direction of this committee needs to be determined.

Tools - DAM to document what we have done with chain falls and what we will do for other tools.

Operations, Maintenance, Lab - Cause for the recent injury trends was discussed along with plans for emergency drills.

The group decided to have a "Key Player" class for operating supervisors and guards to go over the 4 page summary. The session should be scheduled before any drills.

Audits - delete this committee.

Departmental Program Progress - No further discussion.

Other Items

Respirator Fit Testing - all plant personnel to be tested and trained on the use of Scott Air Packs.

Safety Committee

Hose Usage - Cindy Gross reviewed our concerns regarding the use of steam hoses for recovering VCM from equipment prior to Maintenance. She will issue a report covering her recommendations.

Safety Systems Review - Joe Ware noted that we need to review our program and make ourselves feel good about it.
