

MANUFACTURING CHEMISTS ASSOCIATION
TECHNICAL TASK GROUP ON VINYL CHLORIDE RESEARCH
LETTER BALLOT

Please complete and
return by August 27 to:

Dr. Kenneth D. Johnson
Manufacturing Chemists Association
1825 Connecticut Avenue, N. W.
Washington, D. C. 20009

It is the recommendation of my company that the
chronic exposure studies with vinyl chloride monomer
vapors be conducted:

☐ With the exposure levels previously
approved by the Technical Task Group on Vinyl
Chloride Research, i.e., 5,000, 500, and 50 ppm.

☒ With the test protocols revised to provide
for exposures at levels of 2,500, 200, and 50 ppm.
