MR. McGOWAN: Skip 82, skip 83. Skip my designations on 84.

MR. SMITH: Line 9 on page 84 then.

BY MR. SMITH:

Q Is it about this time period 1964 that you learned about Dr. Selikoff's study of cancer and asbestos workers?

A I didn't pay too much attention to it, I remember that.

I just felt that we were in a dangerous area and should get the asbestos the hell out of the product.

Q Am I correct that, even prior to receiving this memorandum in May, 1964, you had already decided that the Kaylo product was dangerous because it had asbestos in it and you ought to get the asbestos out of it?

A Right.

Q Now, do you recall discussions in the 1960s that related to Dr. Selikoff and his findings of cancer in asbestos workers?
