

The Dole Valve Company

Main Offices and Factory: 1901-1941 Carroll Avenue, Chicago 12, Ill.

THE ALL STAR LINE

Dole

AIR AND VACUUM VALVES

Selecting the right vent for a particular purpose is your assurance of the utmost efficiency and economy from one pipe steam heating systems. The Dole line covers every venting need and offers a complete choice for every purpose.

Dole No. 1A Vari-Vent Air Valve

Modern gas, oil or stoker fired one pipe steam systems require QUICK venting. This radiator valve lets air escape twice as fast as ordinary valves and balances the flow of steam at the first "breath" of boiler pressure. Adjustable vari-vent feature gets air out of those "far away"

radiators as quickly as those close to the boiler.

Dole No. 3 Air Valve

Vents radiators of hand fired gravity steam heating systems. Double shell construction provides separate passages for air and condensation—extra large float defeats spitting or water leakage. Complete venting assured at pressures up to 10 lbs.

Dole No. 2B Vari-Vent Vacuum Valve

Adjustable radiator valve for "vacuumizing" and balancing gravity steam heating systems. Patented Dole bellows vacuum seal locks out air after it has been once expelled from the system. Easily adjusted vari-vent feature assists

in equalizing steam flow to all radiators.

Dole No. 1933 Air Valve

Low cost valve for venting radiators of hand fired systems. Large float provides a seal against condensation to stop spitting.

Dole No. 1B Vari-Vent Air Valve

Balances the flow of steam to convectors, either cast iron or copper, of automatically fired systems.

Dole No. 1C Quick Vent Float Valve

Vents mains and speeds flow of steam to radiators of automatically fired systems. Extra large venting port.

Dole No. 5 Quick Vent Float Valve

Vents steam mains on hand fired systems. Positive seal against water.

Dole No. 4 Quick Vent Valve

For quick venting mains that end 18 in. or more above the boiler water line.

Dole No. 103 Vacuum Valve

For venting convectors, ceiling radiators and pipe coils of "vacuumized" gravity steam systems.

Dole No. 6B Vacuum Valve

Vents the mains of "vacuumized" one pipe steam systems. Prevents the return of air. Closes against water.

Dole No. 14 Key Valve

Low cost venting device for concealed radiators and convectors of hot water heating systems. Protects panel fronts from rusty water stain.

OVER 500 DIFFERENT JENKINS VALVES
COVER EVERY HEATING AND AIR CONDITIONING NEED

To adequately describe the complete Jenkins line of valves requires a Catalog of more than 400 pages. There are over 500 different types and patterns of valves that bear the trusted "Diamond" trade mark. Practically speaking, Jenkins can furnish any valve that you may require for plumbing, heating, air conditioning, general industrial or engineering service.

General Classifications of Jenkins Valves Include—Bronze Valves fitted with Jenkins renewable composition disc. Bronze Re-grind-Renew Valves with bevel and plug type seats. Bronze Gate Valves. Iron Body Valves fitted with Jenkins renewable composition disc. Iron Body Re-grinding Valves. Iron Body Gate Valves with solid wedge and double disc parallel seats. All-Iron Valves.

Air Furnace Malleable Iron Valves. Cast Steel Gate, Globe and Swing Check Valves.

Electrically and Hydraulically Operated Valves. Radiator Valves. Fire Line Valves. Quick-opening and Self-closing Valves. Needle Valves, Y Valves, Solder-End Valves, Stainless Steel Valves.

Other Jenkins Products Are—Composition Valves Discs exactly suited to service conditions. Sheet Packing. Gaskets. Friction Tape, Splicing Compound, Jenkins Capless Tire Valves, Mechanical Rubber Goods.

JENKINS VALVES ARE SOLD BY GOOD SUPPLY HOUSES EVERYWHERE
