A Yes.

Q That made him sick and nauseous and stuff and things like that?

A Yes.

Q How long did that last?

A I would have to refer to Dr. Heyman's notes because he was the oncologist giving the medication, but if I recall, it was in the period of time after the intravenous chemotherapy.

Q Doctor, that is not too unusual for people who are getting chemotherapy to get sick, is it?

A That is true. They do get sick after chemotherapy.

Q In fact, this case Mr. Vandergucht said basically I have had enough of chemotherapy, take me off it, didn't he?

A That is right.

Q He wanted no more of it.

Now, did you look at your medical records for April 23rd, 1981? I want to move up in time.

A Specifically to what?
