PROGRESS REPORT for the week ended November 25, 1949

INDUSTRIAL HYGIENE FOUNDATION Industrial Fellowship No. 259-15

Subjects under which report is to be indexed

A day was spent crating and shipping the Annual meeting exhibits.

A day was spent with Mr. Sheppers from South Africa familiarizing him with Industrial Hygiene Foundation's sampling equipment and laboratory procedures.

The test car was taken to Caddy's garage for inspection and minor repairs in preparation for the winter sulfur dioxide survey. Tentative plans were made to rearrange the sampling apparatus in the car and to remove the old bridge apparatus which has not been used for years.

A literature search was made for articles relating to cataracts of the eyes due to radiant heat exposures. Five or six articles were found relating to this subject.
