1978 AWARDS - NATIONAL SAFETY COUNCIL

The Du Pont Company will not be awarded the National Safety Council's Award of Honor for its safety performance during 1978. However, over the thirty-seven years the Award has been offered, Du Pont has won it thirty-two times and more times than any other company.

The National Safety Council Award Plan provides four levels of awards in recognition of good industrial safety records: Award of Honor, Award of Merit, Award of Commendation, President's Citation. These awards recognize a year (or more) of injury-free operation. The Awards of Honor and Merit can also be won with non-perfec records if these are sufficiently above the rank and file to meet standards set by the National Safety Council.

The Award Plan was extended twenty-eight years ago to cover individual units in addition to entire companies. Among our Company plants, laboratories, and construction projects, there have been 2789 awards since the program was extended: 919 Awards of Honor, 930 Awards of Merit, 706 Certificates of Commendation, 234 President's Citations. See attached tabulation for additional information.

We are pleased that the 93 units listed on the attached page are receiving recognition from the National Safety Council for their fine safety performance during 1978. Plaques are being mailed from Chicago. We congratulate these units, and hope that the number of 1979 winners will be even greater.

Of the 103 units entered in National Safety Council's industry section contest, 79 were winners. We hope for more next year.
