

1 structure?

2 A Not that has anything to do with asbestos.

3 Q What division of Chrysler, if any,
4 manufactures the asbestos-containing brake linings or
5 manufactured the asbestos-containing brake linings?

6 A The Trenton Chemical Division, which is now, as
7 I said before, called, or a part of Acustar, and
8 possibly but I'm not sure the Detroit Forge plant,
9 which was simply a plant of Chrysler Corporation at the
10 time and now Chrysler Motors Corporation, made the
11 asbestos-containing parts.

12 Q Do you know when the Trenton Chemical
13 Division started making the asbestos-containing parts?

14 A No.

15 Q Were they making them when you joined
16 Chrysler in 1961?

17 A I don't know. Probably.

18 Q Are they still making them?

19 A To my knowledge they are.

20 MR. CIFALDI: At this time I would like to
21 request the Workers' Compensation records from
22 Trenton Chemical Division and Detroit Forge
23 plant with regard to any claims made by workers
24 dealing with any type of asbestos-related
25 injury. I'll put that in my letter.
