Victopac Stock Sheets

May 19, 1969

H. Dehr

cc: G. M. Brown
J. C. Mayer
D. J. Reda

Confirming several phone conversations with you, I want to get Victopac from Plant 4 cut to size for further manufacture. We've tried buying sheets to stock levels, laying them out and cutting as required, but we end up with lists of odd ball sizes for which we have no further use. These you have taken back. . . . some at full value, some at less than full value. There are some for which even you have no further use. The outlet for Victopac is the Soft Gasket Plant, so let's return to that premise in our ordering.

If on occasion you are bottle necked in the area of shearing capacity, we can arrange for you to send us the number of sheets required to yield the number of pieces ordered. We can square shear and return the ends to you on a lot by lot basis. The necessary accounting and counter charges can be worked out to accommodate this.

We've been kicking this around for some time now; let's put a target date on getting the mechanics set up so that we can be operative under this concept by July 1. I'm certain it will enable us to establish more accurate costs on our Victopac 300 gaskets.

Victopac Stock Sheets

April 18, 1969

H. Dehr

Attached are copies of inventory listings on Victopac presently in stock in the Menard building. I would like to arrange for disposition. All of our requirements for current and future production have been extracted from this list; these may be considered as surplus and/or obsolete. If you do not want it please indicate whether or not it can be used for refiberizing.

April 29, 1969

TO: W. J. Sheehan

FROM: G. M. Brown

SUBJECT: Excess Victopac - Plant #2

Concerning my note of the 10th, covering the subject, Mr. C. McNamara talked to me today and said they have an interest in the Victopac as follows:

I. They will accept the following material at full value.

<u>Skid</u>	<u>Value</u>
45	\$ 206.99
8	161.62
5	213.84
46	401.17
290	<u>396.49</u>
Total	\$1380.06

II. They would accept the following material for use as V-60 (on deviation). However, they would have to scrap the the centers, so they would accept at prime cost less center allowance.

<u>Skid</u>	<u>Full Value</u>
113	805.13
280	74.68
61	187.50

VPD-91-0001106

<u>SKID</u>	<u>FULL VALUE</u>
237	\$ 791.55
126	134.83
127	274.21
200	281.91
201	530.55
258	173.35
273	541.06
236	502.54
	<u>Sub Total \$4297.31</u>

III. All other material will be accepted by Plant #4 for refiberizing purposes only. This other material has a value of \$11,477.89.

Possibly you should contact Mr. H. Dehr to negotiate price on the No. II. item. I will ship the No. I items to Plant 4 and write scrap tickets on the No. III. items, unless you prefer to handle this in any other manner.
