

Memorandum on Plant of the Garlock Packing Co., Supplementing
the General Report: "Preliminary Dust Investigation for
Asbestos Textile Institute" of June, 1947.

Engineering studies planned for the long term investigation of
particular interest to this plant and outlined in the general report are:
dust control in preparation, twisting and weaving, and efficiency of dust
collectors.

Medical

In the medical section of the general report reference is made to
the several companies who have no information as to the incidence of poten-
tial asbestosis in their plant. This company is one of those and we there-
fore wish to underscore here the recommendations concerning periodic x-ray
examinations discussed particularly on pages 11 to 13.
