Fleet Post Office San Francisco
Dec 15, 1944
(RM)

Dear Kehoe:-

We haven't met any
poison gases, yet - but industrial
or accidental poisoning - zinc welders
fumes, methanol, and recently
explosively inflammable Diesel
oil give me some toxicologic
practice - Would lead solder in the
cooling condenser of a mechanical car
constitute a significant danger of
lead poisoning through the milk?

Happy New Year

Emit Bogen.
