

June 4, 1934

Dr. Graham Edgar
Ethyl Gasoline Corporation
Chrysler Building
New York City
New York

Dear Dr. Edgar:

I am enclosing herewith notes on the incidents leading to the poisoning of two men in Dahlgren, Virginia.

It is to be remembered before assuming that the Navy will accept the responsibility for these particular incidents that Ethyl Fluid is also to be found at Pontico, the Marine base not far from Dahlgren, as well as at the Army post in Virginia.

The men will be seen again within the next month, and may be able to give some history of the incident at that time.

Very truly yours,

WFM:IS

Willard F. Machle, M.D.
