

Fiflow® BTX Cream at 10% (N° 1904-2/2005)

Panel test on 4 females

Applicaton of the Fiflow® BTX cream for eye area on four females, ages 53, 46, 35 and 28.
The photos were taken just before application and **90 seconds** after application.

Long term effects on using Fiflow® BTX Cream at 10% level

The Fiflow® BTX Cream product was applied once a day, every day during 18 months. A significant improvement of skin structure can be seen. The test person is a 45 year old female, who uses only Fiflow® BTX Cream.

Note: the 46 year-old woman uses the tested cream daily. The photos show the immediate and the long-term effect of the cream on the 46-year-old woman.
