5K ASBESTOS June 5, 1968

Henry Dehr

This refers to some correspondence concerning wet asbestos received from Chicago.

We have always scrapped wet asbestos whenever we found it in stock. Occasionally there have been problems because of roof leaks around the drains and conductors, but the storage area from which this material was taken is very dry. Len Winchester has personally reviewed the remainder of the asbestos that is in storage and in his opinion, it is satisfactory for shipment to Plant 4.

Upon receipt of your instructions we will ship it to you.
