

December 2, 1975

Mr. R. W. Miltz
Certain-teed Products Corporation
P. O. Box 860
Valley Forge, Pennsylvania 19482

Dear Bill,

During our late October visit, you will recall that Dr. Gaze discussed anticipated production of a more open Blue fibre, specifically milled for a/c pipe production, to be designated as S65. He now advises us that S65 will be available for shipment in May/June of 1976 and that 100 metric tons will be allocated to Certain-teed for test purposes.

We assume you will soon have completed your lab tests on various grades of Amosite and also have had an opportunity to consult with Atlas Asbestos/Montreal as to their results in using Amosite in pipe production. As agreed, twenty or more tonnes of Amosite (a grade of your choice) will also be made available for test.

May I suggest that when you have decided on a grade of Amosite have Bob Hartmann contact our Mrs. Holtze for prices and issue a purchase order with shipping instructions. We would anticipate you will wish to bring in both Amosite and Blue in the same shipment.

I would also like to take this opportunity to thank you for your kind hospitality extended us during our recent visit.

Best regards.

Sincerely yours,

NORTH AMERICAN ASBESTOS CORPORATION

President
