

11—Human Behavior and Safety

new learning more efficient

In no way is this chapter intended to minimize or ignore the work already being carried on to reduce accidents. Safety devices, safer machines, safe work layout, and many other aids and measures all are a part of the total program. The human factor is one more

aspect of the whole system

Men, machines, and materials are still the three components of industry that can contribute to safety.

Machines and materials can be controlled, but the human factor must be guided in the interests of accident prevention
