Mr. Keith Robertson - BOUND BROOK

July 22, 1966

Messrs: Bettoli, Davis, DiGennadi, Kuhlken, Ball

AMOSITE - INTERNATIONAL COMMODITIES EXPORT CORP.

Refer to your letter of 7/8/66 on above subject. According to my comparison the fibre analysis of the Cape Blue Asbestos #2210 indicates it is a shorter fibre than Amosite W-3. This coupled with the fact that the blue fibre would cost \$234.00/ton compared to \$220/ton for W-3 indicates that we would have to use an increased quantity of a higher priced fibre if we used the blue.

If, because of a shortage of W-3 or because of trade relations, you want us to evaluate this fibre we will do so. Other than these factors we don't see any reason to evaluate the fibre in question.
