Subject: Asbestos Nonproduction Materials Utilization Survey

A re-examination of the uses of asbestos containing substances/products within our plants is required in view of recent government statements indicating an intent to control the use of asbestos in the future. The accompanying survey forms have been developed to assist the plants in identifying common asbestos containing materials/products and their usage/application.

The survey information will be reviewed with Industrial Hygiene and Toxicology, Employe Health Services. Applications which are identified in the survey as material handled/used such that asbestos fibers might become airborne will be monitored, as appropriate, and evaluated for possible material substitutions or additional controls to assure adequate employe protection.

Stock Code or Mfg. Std. No.: Enter the local stores stock code number, Manufacturing Standards M-number, shop trial number, or trade name, as applicable.

Annual Usage: Enter the annual usage in the common unit of trade. Approximations may be used if extensive research would be required.

Application: Check the appropriate box. Manufacturing processing materials are those specified by Manufacturing Engineering. Maintenance materials are those specified by the Plant Engineering Department. If the material is a contractor-supplied item, check under "MAINT."

Handling (Threat of Airborne Fibers): Yes/No. Enter "yes" if the material is sawed, abraded, or otherwise handled so that airborne fibers might be released.

PRODUCED BY FORD

SCF-FORD-1891

Remarks: Explain any check under "Application - Other" and include any additional relevant information. Also note in the remarks column if the item is installed in the plant, but no longer used for new installations.

Any Other Asbestos Containing Material Usage: On the last page of the survey form enter any other products/materials containing asbestos which are used that are not enumerated in the products listing.

Survey Sign-off: Enter the name of the plant and division, and signature of the person responsible for the completion of the survey.

Please return the completed forms to R. E. Majors, Plant Engineering Department, Electrical and Electronics Division, on or before May 21, 1980. Should questions arise, please call Mr. Majors on extension 78179.

ASBESTOS NON-PRODUCTION MATERIALS UTILIZATION SURVEY
(Listing of Types of Products which Contain Asbestos)

PRODUCTS CONTAINING ASBESTOS	STOCK CODE/ OR MFG. STD. NO.	ANNUAL USAGE (drums, gals. tons, lbs., etc.)	APPLICATION (check as appropriate) MFG. PROC.	MAINT.	OTHER*	IS MATERIAL HANDLED/USED SUCH THAT FIBERS MIGHT BECOME AIRBORNE?	REMARKS
Asbestos Paper Products							
Accoustical ceiling tile							
Roofing felts (outer layers)	M-10G11 M-10G12						
Pipe and boiler covering							
Vinyl sheet and tile flooring backing							
Paper sheets for heat insulation	M-99G84A						
Millboard	M-99G82A						
Asbestos paper							
Metal reinforced gaskets (for air cooled engines)							
Tape for pipe insulation							
Linings for ovens, kilns, safes, safety boxes, incinerators							
Wall & floor protection near heat generating products							
Soldering and welding blocks							
Fireproof wallboard							
Filtering materials							

Please complete and forward to James W. Shaw, Manufacturing Engrg. and Systems Office, Room 525, World Headquarters.

*Explain in remarks column.
