

November 1, 1973

Mr. James Callaghan
Hill & Knowlton, Inc.
633 Third Avenue
New York, New York 10017

Dear Jim:

In response to your letter of October 31st regarding papers presented at the Conference on Low Level Lead Effects, I am enclosing copies of the following:

1. A paper by Dr. Henrietta K. Sachs
2. A paper by Dr. Gary Ter Haar entitled, "New Information on Lead in Dirt and Dust as Related to the Childhood Lead Problem."
3. A paper by Dr. Jaroslav Vostal entitled, "House and Hand Dust as a Potential Source of Childhood Lead Exposure."
4. A paper by Dr. C.D. Strehlow entitled, "The Significance of High Soil Lead Concentrations to Childhood Lead Burdens."

The paper by Dr. Strehlow summarizes the research results from ILZRO Project LH-193, Environmental Significance of Lead in Soil. The other papers are based on research results of the individuals and are not associated with any ILZRO Environmental Health projects. These are the only papers which we have from the Conference. However, I have received a transcript of the recordings which was sent by Gary Ter Haar. The transcripts are relatively complete (without figures and tables) and contain most of the question and answer periods.

You are welcome to look at our copy, but I would suggest that you contact Mr. Howard Hasselberg for a Hill & Knowlton copy. I would expect the Proceedings of the Conference to be published in the relatively near future.

Sincerely,

Donald R. Lynam, Ph.D.
Assistant Director, Environmental Health
