2. BRACHYRHINUS WEEVIL

This is the time to start putting out bait and spraying your plants to control the brachyrhinus weevils in your garden. These are small beetles, about three-eighths of an inch long with a prominent snout. They feed on the foliage of privet, strawberries, camellias and many other garden plants. The damage is typical, being small crescent-shaped bites taken out of the edges of the leaves. Spread apple bait around the garden on the ground where the weevils are working. Spray or dust the plants with Sindane.

3. EARWIGS ARE SERIOUS PESTS

A concerted effort should be made by everyone to eliminate the European Earwig from our valley. If everyone would obtain some earwig bait and also dust their garden with Sindane, DDT or chlordane dust. The use of these dusts will, at the same time rid your garden of ants.

4. PLANT SUMMER FLOWERS

Summer flowers can be planted now and good sturdy seedling plants are obtainable from your nurseryman. The list includes such favorites as Asters, zonal chrysanthemums, petunia, phlox, annis, marigold, verbena, portulaca and tithonia. All of these need sunshine. On the shaded part of the garden plant begonias, nicotiana, torenia and browallia.

Livermore Rodeo Slates Kids Day

Children of San Jose are invited to attend the Livermore Rodeo as guests June 8 on Saturday, June 8 the first day of the annual two-day performance of the world's fast... cat rodeo.

...ere requirement for the free admission, states ticket director Jack Jensen, is that the youngsters be accompanied by at least one adult.

The kids who attend will see a real western movie star in the person of Slim Pickens, one of America's top rodeo clowns. He has made several Hollywood west... pictures recently and both will be... rodeo one of the top kids favorites before long.

...ew Rose Named for First Lady of American Opera

...ful pink hybrid tea, has been named for the first lady of American opera who is known the world over for her magnificent voice and performances of Wagnerian roles. The sparkling color of this fine rose varies with the weather, sometimes a light, lively pink, more often a luminous apricot which blends into a rich orange.

The buds are unusually large, long and tapered and make a splendid display in themselves. It is in the half-open flowers, however, that Helen Traubel displays its complete charms of form and color while the fully open bloom, extraordinary in size, is still exceedingly beautiful.

Flowers are borne singly at the end of long stems which are ideal for cutting, and a pleasing fragrance brings the additional delicate charm of the garden to the household when they are cut for bouquets.

The sturdy vigorous plant will be one of the largest bushes in the rose garden and it is so prolific that it bears either buds or flowers through nearly all of the blooming season. The petals and texture of the blooms are such that they are not adversely affected by extremes in the weather, and the plant produces perfect flowers under virtually all conditions.

These three magnificent new-

Strawberries Easy To Put in Freezer

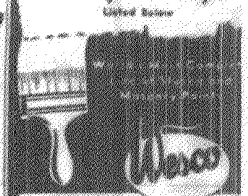

Strawberries are one of the reasons home freezers have become so popular, in the opinion of Mrs. Winifred Jecker, home advisor for the University of California Agricultural Extension Service. Frozen strawberries still retaining their fresh color and flavor in the Winter make something special of the family meal.

Select the best berries that are fully ripe with a distinct flavor. Wash them well and remove the hulls. Crush the berries with sugar or slice them, leaving a few whole ones in the carton for garnish. Use one pound of sugar to each four to six pounds of berries.

Further instructions on how to prepare, store, thaw and cook frozen foods are available in leaflet from the Agricultural Extension Service, 201 Post Office Building, San Jose 13. The publication, entitled "Home Freezing," is free upon request.
