SUBJECT: NON-ASBESTOS RECIPES

Please note that I have confirmed with Gerry Brandt that he should run Armco Ashland boards at Mt. Braddock in EP 5453A (non-asbestos/paper) as previously agreed, and that he should also try an experimental pallet or two in EP 5465 (non-asbestos/no-paper). He will contact Monty Willis for Sales follow-up.

I have also approved that the #394 boards for U.S.S. Homestead be run in EP 5453A (non-asbestos/paper). These were previously run in EP 3999A recipe. We would also like a follow-up by Sales on this non-asbestos new-binder material.

Meanwhile we are attempting to run Ashland material in Cleveland in EP 5453A with a test batch also in EP 5465. If forming problems persist, however, there may be the necessity to continue running at Cleveland in EP 5452A which is the asbestos-bearing material.
