

May 11, 1973

George Fague,

Please call: Paul Brock
Rakston Purina, St Louis, Mo.
982-2436

Subject: Retests of 2nd generation Pygidium

(Please check file, and perhaps Papageorge & legal
before calling Brock).

Brock called me May 11, 1973:

1. Wants some info on Monsanto position
on the status of skin fluid.

2. In Oct, ⁶1972, I wrote Brock,
sent return labk etc. But
his legal dept. held up any action.

3. Brock ~~has~~ now has his legal dept
agreeing to the return, but Brock wanted
some (?) additional info.

4. Brock mentioned that the 3rd generation
Pygidium contained trace PCB by skin
analysis; but Papageorge stated
our control sampler showed no
PCB.

5. Brock would like you to call
this afternoon; he may call you!

0066245
