Dr. R. A. Kehoe

Dear Dr. Kehoe:

This is in reply to your letter of April 26 relative to the book on "Lead Studies". As you know, our safety problem in this Division is quite a large one. We have seven safety men and the amount of work, I believe, is greater than in any other Division so that we have to keep right on top of the safety program. We have used the book from time to time to refresh our memories, Mr. Huxtable, Mr. Fleck, and I having previously read it. We are returning it to you under separate cover. If you feel that you can place it elsewhere at more advantageous service, please feel free to do so, but if at any time you have one to spare or additional publications are available, please bear us in mind as we do want to keep abreast of all developments.

Yours very truly,

L. W. SHANK
