Re: Annual Vinyl Institute Award For Contribution To Safety

In 1984, the Executive Board approved the establishment of an annual award for contribution to safety. This award is meant to recognize the most valuable contribution to safety in the vinyl industry that has been made recently. Such a contribution may have been made available to the industry in general or may have been a unique program in an individual company that has proven successful and which that company now wishes to share with the industry at large.

Nominations should be sent to my attention and received no later than March 1, 1988. A suggested format is attached, but nominations can be in any form (such as a letter) provided the requested information is contained therein.

The Health, Safety & Environment Committee will evaluate all nominations and make its recommendations to the Executive Board for a final decision. The award will be presented at the Vinyl Institute Annual Meeting in May 1988.

You will recall that previous awards have gone to the following recipients:

- 1985 - Dr. John Stafford and ICI for the establishment and maintenance of the Angiosarcoma Registry.
- 1986 - Dow Chemical for a presentation on worldwide storage and loading facilities.
- 1987 - Mr. John Barr and Air Products for unique contribution to industry publications and to standards setting and safety organizations.

Your participation in recommending nominees for this award is strongly urged. Please see that others in your company are made aware of this award so they can offer their suggestions for nominees as well.

Thank you for your assistance in this matter.

Meredith N. Scheck
