Subject: HAZARDS AND OPERABILITY STUDY TRAINING

A Hazard and Operability (HAZOP) Study Training seminar is scheduled for June 25 at the plant. Skip Early, a HAZOP expert with Stone and Webster, will conduct the seminar. Anyone interested in learning about HAZOP is welcome to sit in on Monday's training in the auditorium. This training will begin at 11:00 AM and last until around 4:00 PM with an hour break for lunch. The first hour will be a general overview of HAZOP studies for those that only want a brief introduction. RWS's staff meeting will be rescheduled to 9:30 AM on Monday to accommodate those that would like to attend. I suggest that engineers that are available plan to attend the whole day.

On Tuesday and Wednesday, June 26 and 27, Skip will lead a team in a HAZOP evaluation of the TC Compliance Project. Team members for this first HAZOP on Tuesday and Wednesday are limited to 5 to 10 people and have already been selected. They are:

Skip Early - Leader
Dale Andrews
O. C. Pace
Sherry Ingwersen
Doug Knittig
Steve Hillman
Pete Schirber (PED)
John Wright (PED)
Dale Nawrocki (OKC)

If there are any questions, please call me.
