

VICTOR TODAY....

World's Largest Manufacturer of Gaskets, Oil Seals and Packings

Sealing Products Exclusively — this well-seasoned slogan is perhaps as much as anything else, responsible for Victor's position of leadership today. It clearly pin-pointed the company's aims. It permitted and encouraged concentrated effort in the main area of product interest and service to customers.

As long as there are engines, pumps, machinery and home appliances to be sealed — whether to contain power forces such as internal combustion, or to confine lubricants, fuels and other fluids — there will always be a need for gaskets, oil seals and packings.

Typical industries served by Victor are: automotive, air, water and rail transportation; agriculture; construction power and power transmission equipment; the oil industry; machinery and machine tools; electrical refrigeration and air-conditioning industries; household appliances and suppliers of war equipment.

Victor products are sold in the United States, Canada and throughout the world. The sun never sets on the Victor Trade mark or its products.
