- (h) Patented;
- (i) Specified; or
- (j) Re-labeled.

ANSWER TO INTERROGATORY 19.

Borg-Warner answers with respect to only automotive components that may have contained asbestos, that it manufactured and sold manual clutch assemblies, automatic transmission friction plates and brake bands, and disc brake pads.

Manual Clutch Assemblies: Borg-Warner, Borg & Beck, Long, and Rockford Clutches
Automatic Transmission Brake Bands: Borg-Warner Flexband and Rigidband
Automatic Transmission Clutch Plates: Borg-Warner or Spring Division Friction Plates
Disc Brake Pads: Borg-Warner disc brake pad.

INTERROGATORY NO. 20: With respect to each asbestos-containing product listed for each subpart of Interrogatory No. 19:

- (a) Identify the specific company (Defendant, predecessor, related company) which designed, manufactured, processed, specified, sold, distributed, applied, installed, patented or re-labeled such product;
- (b) State the year in which Defendant, its related company or its predecessor first designed, manufactured, processed, specified, sold, distributed, applied, installed, patented or re-labeled such product; and,
- (c) State the year in which the Defendant, its related company or predecessor last designed, manufactured, processed, specified, sold, distributed, applied, installed, patented or re-labeled such product.

ANSWER TO INTERROGATORY 20.

Borg & Beck clutches were designed, manufactured, processed, specified, sold, distributed and patented by Borg & Beck Division of Borg-Warner Corporation beginning in 1928 and concluding in 1986.

Long clutches were designed, manufactured, processed, specified, sold, distributed and patented by Long Manufacturing a division of Borg-Warner Corporation which joined the Borg-Warner
