PLANT LABORATORY AUDITS

The following plant laboratories were audited this month:

Ethylbenzene Dept. 13&14

The following plant laboratories have not been audited:

Acetic Acid Dept. 50
Methanol/Syn Gas Dept. 44,45&46
Environmental Control Dept. 513
Phthalic Anhydride Dept. 53

SHAC will coordinate with plant supervision to schedule audits for these labs.

STOP PROGRAM

The STOP cards from Technology have dropped off to almost nothing. This means that the Tech Center personnel are not taking the time necessary to observe safety violations on a routine basis. TCSC will undertake a program of advertising this lack of participation to help get the program back equal to production, cost, quality and morale within Technology.

VIDEO TAPE ON MONSANTO HEARING CONSERVATION PROGRAM

The tape was made available for all Tech Center personnel November 3,4 and 7. Between 80-90 people saw the tape, a good turnout. For any groups that did not see the tape contact R. Whitehead (x-3676) to schedule a time.

NEXT MEETING

The next regular TSCS meeting will be held on Thursday, December 15, 1983 at 8:30 am in Research 1 Conference Room.
