Mr. Jack T. Garrett
Manager of Industrial Hygiene
Monsanto Company
800 N. Lindbergh Blvd.
St. Louis, Missouri 63166

Dear Mr. Garrett:

As we discussed during our telephone conversation on June 3, 1976, the National Institute for Occupational Safety and Health (NIOSH) is studying the exposure levels and the health effects of polychlorinated biphenyls on industrial workers.

Since Monsanto is the sole manufacturer of PCB's in the United States it is necessary to visit your plant in Sauget, Illinois to determine the level of worker exposure. I would like to arrange this visit for the latter part of the week of July 5. The survey will take approximately two days and will be conducted by myself and one other person. We will need to take both area and personnel air samples and obtain job descriptions and other information about the operation.

I can be reached at (513) 684-3255 in order to finalize arrangements for our visit.

I appreciate your hospitality extended in our telephone conversation and thank you for your cooperation.

Sincerely yours,

Ronald J. Young
